

USER MANUAL CONSERVATION AND ERGONOMICS

Sofas and Armchairs

Congratulations! You have purchased a genuine Cavaletti product, manufactured with highest quality and safety standards.

Cavaletti always leads the way in management processes, committing itself to the environment and especially to the company's relations with its employees, partners and the community. Be aware and prioritize recycling or reuse of purchased products. See some tips and guidelines at: <http://www.cavaletti.com.br/empresa/detalhes/sustentabilidade/>

KEEPING YOUR CAVALETTI

Cavaletti employs differentiated quality standards in the development and production of seats for professional and collaborative environments. At the time of purchase, check the product that best suits your needs.

By following the recommendations below, you will keep the functionality and beauty of your Cavaletti product for much longer. Please read carefully the following guidelines:

CLEANING GUIDELINES:

Do not Wash/Soak

Do not dry clean

Do not Bleach

Do not press

FABRICS AND MESHES: For the removal of dust and / or debris use brush with soft bristles.

CEC AND VINYL: To clean, use a clean, soft white cloth with a little diluted neutral soap, remove the soap with a damp cloth and dry immediately.

NATURAL LEATHER: To clean use a clean soft white cloth with a little mild soap, remove the soap with a damp cloth and then dry. Use automotive leather moisturizer one or two times a year to prevent dryness of material.

Note: To remove coffee stains, sweat or pen ink, use a brush with soft bristles moistened with water with mild soap. Do not use a damp cloth for cleaning fabrics, thus avoiding the transfer of fibers, formation of pillings and color transfer.

By performing the quick cleaning, there is a greater possibility that many common stains from everyday life will be removed effectively, such as: grease, pen paints and coffee. For fabrics with anti-flame treatment the cleaning must be done dry avoiding water and soap.

PAINTED METALS: For dust removal use only a cloth lightly moistened with water on painted surfaces.

CHROMED METALS: Use a cloth slightly moistened with 70% ethyl alcohol (77° GL, the same as for disinfection). This will be enough to remove dust accumulation from the component surfaces. It is recommended to use dry wax and flannel or other soft and dry fabric, never rough sponges or steel wool. It is recommended to clean parts at 90-day intervals. On the coast, where salinity harms the pieces the most, reduce the period to 30 or 60 days.

PLASTICS: To clean, use a clean, soft white cloth (preferably cotton cloth) lightly moistened with water and mild detergent, drying immediately. To revitalize the gloss, use only silicone gel (the same used in automobiles for plastic parts).

***when available on model**

CASTERS: Clean the casters monthly. The dirt present on the floor can adhere and with the friction, can stain the floor. If used incorrectly they can break.

***when available on model**

GENERAL GUIDELINES:

-Always keep the upholstery in a cool place.

-Do not use the product on uneven floors.

-Avoid exposing the product to sun and moisture and direct artificial light.

-Avoid using chrome on beaches or near the coast, as

the salt and sand cause early wear on the product.

-Never use the backrest or the armrests as a seat.

-To move the upholstery, always support it by the structure and never by the arms.

-Avoid using vacuum cleaners, if necessary, use it carefully as they may damage the coating

-Avoid hitting, pressing or scraping the plastic, metal, upholstered or wooden parts of the upholstery.

-Avoid resting uneven and heavy objects on the upholstery for a long time, as this may damage the foam and the coating

-Do not make repairs or repairs to locations not authorized by Cavaletti

-Never use chemicals or abrasives (soaps, acids, solvents, bleaches, furniture polishes, containing alcohol or petroleum derivatives, among others) to clean the coatings.

-Do not use abrasive materials (sponges or steel mesh), scratching objects, solvents or acids on varnished plastic, metal and wood surfaces.

-Some types of fabric have a higher percentage of cotton or polyurethane in their composition and, therefore, it is natural for coatings such as Politex, Mixture and CEC to undergo conformation according to their use, since the perception of comfort of these fabrics is related precisely in this ability of the fabric to conform to the pressure exerted on the foam or the backrest and the seat compared to fabrics having a higher percentage of polyester and synthetic fibers in their composition are less rigid and the deformation is less.

-Plastic and painted finishes in light gray or silver need cleaning more frequently than others.

-Clean your Cavaletti product monthly. The accumulation of dust in direct contact with moisture or sweat can stain the fabric, leaving the product looking old and making removal more difficult, deeply impregnating the material. In case of accidental stains, please contact Cavaletti so that we can assist in the best solution to the problem.

-Products with dyeing (ex: Jeans) may transfer color to the chair's coat, not featuring defect.

Products that have electronic system:

-Check the voltage before calling;

-Observe correctly the instructions for use regarding the electronic system;

-Avoid exposing the wires in a place of circulation, which may cause breakage and contact with the wires;

-Electronics are not warranted against environmental weather or damage to the mains.

WARRANTY TERMS CAVALETTI

According to Paragraph 2 of Article 26 of the Consumer Protection Code - Law 8078 of September 11, 1990 "The right to claim the apparent defects or easily lapse observation in ninety (90) days, in the case of service provision and durable products." But **Cavaletti S/A Professional Seating** extends the warranty of their products for a period of Six **(6) years** against manufacturing defect in the metal structure, and one **(1) year** to the other components and chrome finish, when considering an 8 work shift (eight) hours a day by people weighing up to 110 kg, provided they observed the normal conditions of use and observing the recommendations of Use and Conservation of the product, in this manual.

This term **COVERS**:

- Parts or components with manufacturing defect.
- The warranty period is valid with the invoice presentation of the product and is counted from the date of issue.

ITEM / WARRANTY (in months)	LEGAL	ADDITIONAL	TOTAL
Structure - wood, metal, mounting devices.	3	9	12
Metal joints, casters, plastic parts and slides.	3	9	12
Padding - Polyurethane Foams, Straps and Springs.	3	9	12
Coatings - fabrics, seams, closures and buttons.	3	3	6

This term does **NOT COVER**:

- Defects caused by improper use of the product, lack of minimal care, improper assemble or installation, maintenance performed by third parties without prior authorization from Cavaletti.
- Difference of tonality between coatings of products acquired on different dates.
- Deformations on foam used in seats and backrests up to 10% of their original size are considered appear with the use.
- Claims of any characteristics intrinsic to the craft nature of the

product, such as slight variations in sewing height, tolerances in cushion alignment, product measurements and any other minor differences due to manual manufacturing techniques. The upholstery is handmade, which shows the nobility and attention to detail.

- Difference in alignment of seams between moving and fixed parts such as seats, backrests and arms is normal, considering that they are parts that are in constant motion as they are used.
- Damage caused by exposure to the elements, use of the product in outdoor or moisture / high heat areas, as well as use on rough terrain.
- Chrome finish in plastic parts.
- Damage caused by natural disasters such as flood, fire, etc.
- Defects occurred during transport carried out by the customer or carrier under the customer's responsibility.
- Amendments made to the product by the owner and / or unauthorized persons.
- Materials provided by the customer, such as tissue or other material that is not standard Cavaletti line.

In case of defect, in order to enjoy the warranty, the consumer should contact the company where he purchased the product, with the invoice of the same. A product shall not be considered defective and Cavaletti shall not be obliged to replace it if it is not installed or used as recommended in the instruction manual of this manual.

Cavaletti is available to answer any questions regarding your products and services, as well as to guide you in the best way about warranty procedures or the conservation of your product.
